PROJECTS

VeilText - Profanity Filter Chrome Extension

- VeilText – Profanity Filter is a Chrome Manifest V3 browser extension that performs real-time detection and filtering of unwanted textual web content using efficient string-matching algorithms, including Aho–Corasick and Wu–Manber. It scans static and dynamically loaded DOM content and allows users to blur, hide, or replace matched keywords while processing data locally to preserve user privacy.

Prime Meridian Realty Website

- Developed a full-stack real estate web application that allows visitors to browse property listings and administrators to manage property records through a secure admin interface. Built using React, Vite, Express.js, and PostgreSQL, with REST API integration, admin authentication, CRUD operations, and database migration management. Deployed the application for live access.

MoodCheck – Daily Mood & Motivation App

- Led the full-stack development and UI/UX design of a Flutter mobile mood-tracking application. Designed intuitive user interfaces and built both frontend and backend functionality to deliver interactive calendar visualizations, daily reflection logs, and automated mood trend analytics.
